

**Active Directory Domain Services Installation Wizard**

**Choose a Deployment Configuration**  
You can create a domain controller for an existing forest or for a new forest.

☒ Existing forest

- ☒ Add a domain controller to an existing domain
- ☐ Create a new domain in an existing forest  
This server will become the first domain controller in the new domain.
- ☐ Create a new domain in a new forest

**Active Directory Domain Services Installation Wizard**

**Directory Services Restore Mode Administrator Password**

The Directory Services Restore Mode Administrator account is different from the domain Administrator account.

Assign a password for the Administrator account that will be used when this domain controller is started in Directory Services Restore Mode. We recommend that you choose a strong password.
